

## Press Release

06/05/2025

### **Quality & Reliability successfully presented the Integrated Information System for the Court of Audit at the Ministry of Justice**

The project "**Integrated Information System for the modernization of the operation of the Court of Audit**" was successfully completed by **Quality & Reliability** and was officially presented today in Athens, in the presence of the country's political and judicial leadership.

The project, implemented as part of the broader digital transformation of the Justice sector and falling under Operational Unit 1 (OU1) of the overall "Upgrade and Expansion of ICT Infrastructure in the Justice Sector" initiative, comprised the procurement, installation, configuration, and commissioning of specialized hardware and software, as well as the development of ten advanced information subsystems.

With deep expertise and a steadfast commitment to the project's public mission, Quality & Reliability designed and delivered a complete information ecosystem that ensures:

- Full digitization of the Court of Audit's workflows
- Integrated management of all audits conducted by the Court of Audit
- Full digitization of the workflows of the General Guardianship Authority of the State
- A modern online portal for delivering digital services and engaging with citizens and stakeholder organizations
- Secure digital handling and routing of incoming and outgoing documents
- Interoperability with other key public bodies and judicial authorities
- Creation of a digital repository of legal content and operational knowledge, with automated anonymization
- Assurance of timely administrative reporting and informed decision-making

The presentation of the project took place during an informational event co-organized by the **Ministry of Justice**, the **Ministry of Digital Governance**, and **Information Society S.A.**, in the presence of numerous representatives from the political, judicial, and technology communities.

Among others, greetings and remarks were delivered by:

- The Minister of Justice, Mr. Georgios Floridis (recorded message)
- The Minister of Digital Governance, Mr. Dimitris Papastergiou (letter read aloud)
- The Deputy Minister of Justice, Mr. Ioannis Bougas

This Press Release constitutes the disclosure of inside information by **QUALITY & RELIABILITY S.A.** in accordance with **Regulation (EU) No. 596/2014** (April 16, 2014) and **Law 3556/2007**.

- The President of the Court of Audit, Ms. Sotiria Ntouni
- The CEO of Information Society S.A., Mr. Stavros Asthenidis

The benefits of the project were presented by **Mr. Dimitrios Tsakanikas**, Advisor to the Court of Audit. He also made special reference to the additional subsystems to be implemented under the project's optional scope. These include the **Integrated Human Resource Management Subsystem** and the **AI-Powered Judicial Assistant Subsystem**, which, among other functions, will propose well-documented draft rulings with sources to judicial officers—facilitating and accelerating the delivery of justice.

A dedicated presentation of the project was delivered by **Dr. Panagiotis Paschalakis**, Co-founder and CEO of **Quality & Reliability**, who highlighted the system's contribution to enhancing transparency, efficiency, and the effective administration of justice. He stated:

“We are proud to have actively contributed to the digital transformation of such a significant institutional pillar as the Court of Audit.

The Integrated Information System we developed is an innovative platform that promotes transparency, efficiency, and accessibility in the justice sector.

The trust shown to us by the country's institutions is, for us, a commitment to continuous improvement and the provision of cutting-edge technological solutions for the public sector.”

The project was implemented under the **National Recovery and Resilience Plan “Greece 2.0”**, co-financed by the **European Union – NextGenerationEU**, in collaboration with the competent public authorities.

With the successful implementation of the Integrated Information System for the Court of Audit, **Quality & Reliability** reaffirms its strategic role as a trusted partner of the public sector on the path toward a digital era for justice.

**Quality & Reliability (QnR)** has evolved into a dynamic Group of Companies, leading the way in the fields of technology and information systems. The recent acquisitions of **60% of SysteCom S.A.**, a rapidly growing cybersecurity company, and **51% of the Belgian firm Squaredev B.V.**, which operates in the field of artificial intelligence, further strengthen the Group's commitment to delivering innovative, integrated, and high value-added technology solutions.

At the same time, through its subsidiary **QnR Financial Services S.A.**, the Group is expanding its strategic presence into the domain of **digital banking transformation**.

With a client base of more than **250 major organizations and enterprises** in both the public and private sectors, the QnR Group continues to invest in cutting-edge technologies such as **cloud computing, Big Data, and artificial intelligence**.

QnR offers **innovative, flexible, and secure software solutions** that support the digital transformation of its clients, enhancing their efficiency, resilience, and competitiveness.
