## Press Release

12/06/2023

### **Q&R has been awarded a new IT project by Information Society for the Ministry of Digital Governance**

The consortium, consisting of the companies "VODAFONE PANAFON S.A. - COSMOS COMPUTERS S.A. - QUALITY & RELIABILITY S.A.," has signed a Framework Agreement with eleven other contractors for the project titled "Development of Internet Services (Web Services) to Achieve Interoperability among the Information Systems of Public Administration." Quality & Reliability S.A. holds a 24.5% stake in the consortium, and the total budget for the project amounts to €22,500,000.00 plus VAT, with the consortium's share corresponding to €1,875,000.00 plus VAT.

#### **Process of signing Executive Contracts**

Following the signing of the Framework Agreement with the twelve (12) Contracting Parties, the Project will be divided into individual Sub-projects, according to the specific needs of the Ministry of Digital Governance. The exact scope, total price, and execution timelines of each Sub-project are not known in advance but will be determined with each respective Executive Contract signed between the Contracting Authority and the respective Contractor.

#### **Purpose of project**

The object of the Framework Agreement is the provision of a specialized package of Internet services for the development of G2G (Government-to-Government) web services among the information systems of public administration bodies. The goal is to achieve interoperability between them and facilitate the following:

- Transactions between government agencies (G2G) that are considered a necessary condition for further e-Government initiatives. This effectively ensures interoperability between public administration bodies and enhances the automatic retrieval of supporting documents.
- Transactions between public administration bodies and citizens (G2C), as well as between agencies and businesses (G2B). This direction aims to strengthen the National Portal gov.gr by introducing and activating additional e-Services.
- The creation and provision of services of common interest for public administration bodies, which will enable the upgrading of electronic services offered by agencies to the highest possible level of digitization, per service.

**The implementation schedule of the project is 36 months.**

Q&R has implemented and supported the productive operation of complex and critical Information Systems, based on cutting-edge technologies, for numerous organizations and businesses in Greece and abroad. In its thirty years of operation, it has made significant contributions to the digital modernization of the broader public and private sectors and the creation of value and competitive advantage for its clients through its technical expertise and innovative software products.

Q&R's client portfolio currently includes more than 250 large organizations and businesses from the private and public sectors. Leveraging new technologies, the company develops new solutions in the field of cloud services, offering modern services specifically designed for small and medium-sized enterprises.
